

Contents

A Time to Scatter Genes and a Time to Gather Them: Evolution of Photosynthesis Genes in Bacteria

Armen Y. Mulikidjanian and Michael Y. Galperin

Molecular Markers for Photosynthetic Bacteria and Insights into the Origin and Spread of Photosynthesis

Radhey S. Gupta

Properties and Evolutionary Implications of the Heliobacterial Genome

W. Matthew Sattley and Wesley D. Swingley

Green Bacteria: Insights Into Green Bacterial Evolution Through Genomic Analyses

Donald A. Bryant and Zhenfeng Liu

Comparison of Photosynthesis Gene Clusters Retrieved from Total Genome Sequences of Purple Bacteria

Sakiko Nagashima and Kenji V. P. Nagashima

The Living Genome of a Purple Nonsulfur Photosynthetic Bacterium: Overview of the Rhodobacter Sphaeroides Transcriptome Landscapes

Mark Gomelsky and Jill H. Zeilstra-Ryalls

The Evolution of the Purple Photosynthetic Bacterial Light-Harvesting System

Sarah L. Henry and Richard J. Cogdell

Role and Evolution of Endogenous Plasmids in Photosynthetic Bacteria

John C. Willison and Jean-Pierre Magnin

Evolution of Bacteriophytochromes in Photosynthetic Bacteria

Miroslav Papiz and Dom Bellini

Iron Homeostasis in the Rhodobacter Genus

Sébastien Zappa and Carl E. Bauer

Genes Associated with the Peculiar Phenotypes of the Aerobic Anoxygenic Phototrophs

Vladimir Yurkov and Elizabeth Hughes

Evolutionary Divergence of Marine Aerobic Anoxygenic Phototrophic Bacteria as Seen from Diverse Organizations of their Photosynthesis Gene Clusters

Qiang Zheng, Michal Koblížek, J. Thomas Beatty and Nianzhi Jiao

Regressive Evolution of Photosynthesis in the Roseobacter Clade

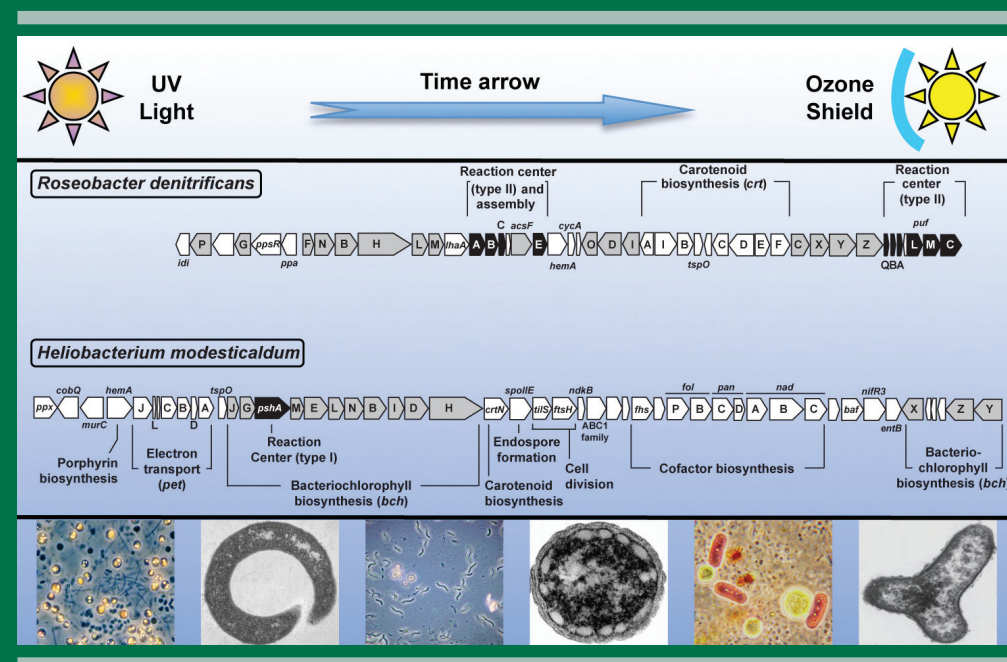

Michal Koblížek, Yonghui Zeng, Aleš Horák and Miroslav Oborník

Cover Image: A collage based on unpublished light micrographs courtesy of J. Overmann and J.T. Beatty, and figures from the volume: A time to scatter genes and a time to gather them: evolution of photosynthesis genes in bacteria (Chapter 1) Properties and evolutionary implications of the heliobacterial genome (Chapter 3); Green bacteria: insights into green bacterial evolution through genomic analyses (Chapter 4); Genes associated with the peculiar phenotypes of the aerobic anoxygenic phototrophs (Chapter 11).
